Удаленные ветки

Не всегда ветки в Git остаются на компьютере. Иногда приходится работать на нескольких, поэтому ветки приходится отправлять; но в какой момент отправлять не ветки нужно решать. Для этого существуют удаленные ветки (специальные ветки для работы с удаленными репозиториями). Удаленные ветки не являются полноценными ветками на компьютере и нам нужно (например чтобы с ними работать), они являются лишь ссылками.
